First/Second Semester B.E. Degree Examination, June / July 2014

Note:	3 hrs 1. <i>An</i> .	swer any FIVE full questions, choosing	g at least two from ea	Max. Marks:100
		swer all objective type questions only or		
	3. Ans	swer to objective type questions on shee		
4	1. Use	e of steam tables is not permitted.		
		<u>PART – </u>	<u>A</u>	
1 a.	Cho	oose the correct answers for the following		(04 Marks
	i)	The centrifugal forces generated by the	earth rotation on the fa	ir side tesults in anothe
		bulge rise on this side of the earth.		
	4.4	A) Lunar tides B) Earth quakes	C) Volcanoes	D) None of these
	11)	The condition of steam in the boiler is a	•	
		A) Dry B) Wet	C) Saturated	D) Superheated
	iii)	Super heater is used,		
		A) Inside the boiler drum		t steam into dry steam
		C) In the path of the gases to increase v		
	i.es	D) To increase temperature of steam ab	•	ture.
	iv)	Babcock and Wilcox boiler is A) Fire tube B) Water tube	boiler.	D) Einni tulo
b,	33/6		C) Air tube	D) Fioxi tube
O,		h the help of a temperature – enthalpy dia team.	igram, explain me mec	manism of its formatio (10 Marks)
C.		ne any five boiler mounting and accessorie	es and state their figreti	
0.	1,44.	ne any irvo conter modulary and accessors	es and state (non name)	Olio,
2 a.	Cho	oose the correct answers for the following		
		A SOUTH COLLECTION OF STOLE WILL TO THE WARE		(04 Marks
				(04 Marks
	i)	In reaction turbine, the pressure drops, A) In nozzles		ď
-		In reaction turbine, the pressure drops.	B) In moving blace	ď
		In reaction turbine, the pressure drops, A) In nozzles	B) In moving blace	les
	i)	In reaction turbine, the pressure drops, A) In nozzles C) In fixed blades	B) In moving blace D) In both fixed a	les
	i)	In reaction turbine, the pressure drops, A) In nozzles C) In fixed blades Kaplan turbine is,	B) In moving blace D) In both fixed a	les nd moving blades. bine, outward flow
	i)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a	B) In moving blace D) In both fixed a B) An impulse tur	les nd moving blades. bine, outward flow
	i) ii)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbing	les Ind moving blades. Ibine, outward flow al flow.
	i) ii) iii)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure comp	les Ind moving blades. Ibine, outward flow al flow. The Ounded turbine.
	i) ii) iii)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure comp	les Ind moving blades. Ibine, outward flow al flow. Ice ounded turbine.
	i) ii) iii)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as,	B) In moving blac D) In both fixed a B) An impulse tur D) Low head, axis B) Reaction turbin D) Pressure comp e is continously recircus	des Ind moving blades. Ibine, outward flow Al flow. The Ounded turbine. Illated, then it is called
	i) ii) iii)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine	B) In moving blac D) In both fixed a B) An impulse tur D) Low head, axis B) Reaction turbin D) Pressure comp e is continously recircu B) Closed cycle g	des Ind moving blades. Ibine, outward flow al flow. The ounded turbine. Ilated, then it is called
	i) ii) iii) iv)	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine	B) In moving blac D) In both fixed a B) An impulse tur D) Low head, axis B) Reaction turbin D) Pressure comp e is continously recircu B) Closed cycle g D) None of these	les Ind moving blades. Ibine, outward flow al flow. It ounded turbine. Illated, then it is called as turbine
b.	i) ii) iii) iv) Diff	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a	B) In moving blac D) In both fixed a B) An impulse tur D) Low head, axis B) Reaction turbin D) Pressure comp e is continously recircu B) Closed cycle g D) None of these cycle gas turbine with n	des Ind moving blades. Ibine, outward flow It flow. It counded turbine. Illated, then it is called as turbine Icat sketches. (08 Marks
	i) ii) iii) iv) Diff	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine	B) In moving blac D) In both fixed a B) An impulse tur D) Low head, axis B) Reaction turbin D) Pressure comp e is continously recircu B) Closed cycle g D) None of these cycle gas turbine with n	des Ind moving blades. Ibine, outward flow al flow. Ice ounded turbine. Ilated, then it is called as turbine Icat sketches. (08 Marks
þ. ē.	i) ii) iii) iv) Diff	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine ferentiate between open cycle and closed of tch and explain the working of a Kaplan to	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure complete is continously recircum B) Closed cyclete D) None of these cycle gas turbine with nurbine.	des Ind moving blades. Ibine, outward flow al flow. It Is Ounded turbine. Illated, then it is called as turbine Is turbine
þ. ē.	i) ii) iii) iv) Diff Ske	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine ferentiate between open cycle and closed of tch and explain the working of a Kaplan turbine cose the correct answers for the following	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure complete is continously recircut B) Closed cyclete D) None of these cycle gas turbine with nurbine.	les Ind moving blades. Ibine, outward flow al flow. It ounded turbine. Ilated, then it is called as turbine Icat sketches (08 Marks)
þ. c.	i) ii) iii) iv) Diff	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine ferentiate between open cycle and closed of tch and explain the working of a Kaplan turbine ose the correct answers for the following In a 4 stroke CI engine during suction st	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure complete is continually recircus B) Closed cycle g D) None of these cycle gas turbine with nurbine.	nd moving blades. bine, outward flow al flow. ne ounded turbine. lated, then it is called as turbine leat sketches (08 Marks) (04 Marks)
þ. ē.	i) ii) iii) iv) Diff Ske	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine ferentiate between open cycle and closed of tch and explain the working of a Kaplan turbine oose the correct answers for the following In a 4 stroke CI engine during suction st A) Only air is sucked	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure complete is continually recircus B) Closed cyclety D) None of these cycle gas turbine with nurbine. roke, B) Only diesel is	des Ind moving blades. Ibine, outward flow al flow. It It Is It Is Is Is Is Is Is
þ. ē.	i) ii) iii) iv) Diff Ske	In reaction turbine, the pressure drops. A) In nozzles C) In fixed blades Kaplan turbine is, A) A high head mixed flow turbine C) A reaction turbine, outward flow Delaval turbine is a A) Impulse turbine C) Velocity compounded turbine In a gas turbine, if the working substance as, A) Open cycle gas turbine C) Mixed flow gas turbine ferentiate between open cycle and closed of tch and explain the working of a Kaplan turbine ose the correct answers for the following In a 4 stroke CI engine during suction st	B) In moving blace D) In both fixed a B) An impulse turn D) Low head, axis B) Reaction turbin D) Pressure compete is continously recircut B) Closed cycle g D) None of these cycle gas turbine with nurbine. Expense of these cycle gas turbine with nurbine.	des Ind moving blades. Ibine, outward flow al flow. It ounded turbine. Idlated, then it is called as turbine Icat sketches. (08 Marks) (08 Marks) (04 Marks)

	Q. N iii)	A) SparkB) Ignitor	ne the fuel is igniting from compres		at is su	pplied for comb		
		A) Stroke * rp	m B) 2*strok	e*rpm	C) 4	3 stroke*rpm	D)	(stroke*rpm)
ъ. ¢.	The Cylin Cran Bral Dies Spec	following observender diameter = 1 tk shaft speed = 1 tk drum diameter	250 rpm; t = 2 m; $t = 0.1 \text{ m}^3/\text{min};$	Stroke Brake I Mean e CV = 4	g a trial of the p oad = 7 ffective	on a four stroke siston = 40 cm 0 kg pressure = 6 ba	ЯГ	(08 Marks) sel engine: (08 Marks)
a .	Cho	ose the correct at	swers for the foll	owing:				(04 Marks)
	i)		nt of ammonia is,					
		A) 100°C	B) -33.3°			3.3°C		0°C
	ii)		y used refrigerant	in vapour			+	
1	. 4	A) Freon	B) CO ₂		C) S	O_2	D)	NH_3
	iu) iv)	A) Compress r C) Absorb the	s used in refrigera efrigerant heat from the refr rant should have,	igerant		xpand the refrigondense the refr		
	6.5	A) Low viscos			B) L	ow freezing poin	11	
		C) Low boiling	point			ll of the above		
b.	Wha		e properties of re	frigerant?	,			(06 Marks)
C.			xplain the constru		worki	ng of vapour abs	corpti	
	syste						•	(10 Marks)
			\mathbf{p}_A	ART - B				
a.			iswers for the foll					(04 Marks)
	1)		enlarging an alrea					
		 A) Spot facing 				Tapping	D)	Boring
	ii)		ess of generating		rreads			
		A) Tapping	B) Turnir			Cnurling	D)	None of these
	iii)		ed in Lathe is add				:	
	8	A) Turning	B) Thread	dcutting	C) 7	Tapper turning	D)	Knurling
	IV)		usually made of					
		A) HSS	B) Diamo			Carbides	D)	MS
b.			which specify th					(06 Marks)
Ċ:	_		e between facing					(04 Marks)
d.	Drav	w the neat sketch	of radial drilling	machine a	nd labe	l all its parts.		(06 Marks)

5

6 a. Choose the correct answers for the following:					
		i) The cutting tool in a milling machine is mounted on (04 Marks)			
		A) Tool holder B) Arbor C) Column D) Table			
		ii) is the one of the abrasive material used in grinding machine.			
		A) Aluminum chloride B) Calcium chloride			
		C) Silcon carbide D) Tungsten carbide			
		ii) The thickness of chip is maximum at the beginning of the cut and minimum at the end			
		of the cut, cut in each case of			
		A) Up milling B) Down milling C) Straddle milling D) None of these			
		iy) One of the milling operation used to produce dovetail groove is			
		A) Slot milling B) Straddle milling			
		C) End milling D) Angular milling			
	b.	Differentiate between Up milling and Down milling. (04 Marks)			
	e	With a neat diagram, explain the working of a vertical milling machine. (06 Marks)			
	d.	With suitable sketches, explain the operation of centreless grinding machine. (06 Marks)			
		(v :vaivs)			
7	a.	Choose the correct answers for the following: (04 Marks)			
		i) The hard filler material used in brazing			
		A) Solder B) Flux C) Spelter D) Electrode			
		Support provided for rotating shaft is			
		A) Bearing B) Lubricant C) Axle D) Hook			
		iii) Carburizing flame has			
		A) One Zone B) Two Zone C) Three Zone D) No Zone			
		iv) In arc welding the electrode which melt along with the work pieces and fill the loint is			
		called as			
		A) Consumable electrode B) Non consumable electrode			
		C) Both (a) and (b) D) None of these			
	b.	Sketch and explain electric arc welding process. (06 Marks)			
	c. With a neat sketch, explain the different types of flames used in gas welding ar				
		their application. (04 Marks)			
	d.	Explain with a neat sketch, the method of splash lubrication. (06 Marks)			
8	a.	Choose the correct answers for the following: (04 Marks)			
	i) For converting rotary motion into rectilinear motion type of gear used is				
		A) Spur gear B) Rack and pinion C) Spiral gear D) Bevel gear			
		ii) The ratio of diameter of driver and driven pulley is called			
		A) module B) Pitch circle diameter			
		C) Ratio of tension D) Velocity ratio			
		iii) The gear used to connect perpendicular axle shaft is			
		A) Helical gear B) Spur gear C) Bevel gear D) Wörm gear			
		iv) The ratio of pitch circle diameter to number of teeth is			
		A) Pitch B) Circular pitch C) Module D) Addendum			
	b.	List five advantages of gear drives over belt drives. (05 Marks)			
	·C.	Define slip and creep with respect to belt drives (05 Marks)			
	d.	Write the different types of gear trains with their applications. (06 Marks)
